What we will learn

A motorcycle is a bike with two or three wheeled motor vehicle. A motorcycle is designed for different purposes, like for a long distance travel, and for sports including racing, cruising, off-road riding and etc. Do you know the types of motorcycles? Are you familiar with the historical flashback of motorcycle? Do you know the equipment you need to ride a motorcycle? The booklet of "***Motorcycles***" contains a great deal of useful information and amazing facts, so that you will learn all about motorcycles. Read through the pages of this booklet to discover the types of motorcycles and the equipment you need to ride a motorcycle. Follow the bulding instructions, contained in this booklet to build exciting models such as a **trial bike**, an **off roader** and **scooter**. Enjoy this journey of acquiring new information on different types of motorcycles.

Riding on a sunny day is a joy

The History of Motorcycles

The history of the motorcycle begins in the second half of the 19th century. Motorcycles are descended from the "safety bicycle", a bicycle with front and rear wheels of the same size and a pedal crank mechanism to drive the rear wheel. A motorcycle was often called a bike, motorbike, or cycle which was a two or three-wheeled motor vehicle.

Historical Flashback of the Motorcycle

1920 Gottliemb Daimler built a motorcycle to test engines and that was the reason for the birth of the motorcycle. In the next century there has been rapid progress in design, strength and performance.

1930 During the Great Depression, the target changed and motorcycles were developed more in terms of appearance, performance and became affordable to citizens.

1940 As the world was in war, the development of motorcycles was interrupted.

1950 While cars were still a luxury, simple two-wheeled motorcycles were still the obvious choice and the scooters were on the rise.

1960 The rise of the car hit hard the motorcycle industry and new markets included scooters.

1970 Motorcycle models for off-road have been released for adventure enthusiasts in the USA.

1980 Motorcycles were renewed and interest in classic motorcycles also influenced the design of the new models. Motorcycles became more racing and fully equipped.

1990 Elegant and economic scooters have won a new generation of fans due to the increase of price in fuel and congestion.

2000 Motorcycle riders in the new millennium are rewarded with excellent technological advancement, luxury and comfort.
