

GENERAL TEACHER'S GUIDE

GinoBot™ is the new hybrid robot by **ENGINE®**! It has been developed to be ready-to-program, ensuring coding skills can be taught without losing time for constructing models. Appreciating however, the significance of model building, the body of GinoBot™ has numerous built-in **ENGINE®** connecting geometries. This ability to expand the robot according to student's age, level and knowledge, helps teachers follow STEM interdisciplinary activities and apply inquiry based learning methodologies. The basic Edition comes with a wealth of sensors and features and can be used for a wide range of activities and coding challenges, scalable depending on the student's age.
