IN70
Edition 3.0

Bill of Materials

Technology Explained

This new INVENTOR Mechanics range has been developed to inspire children of ages 9+, to follow STEM careers and develop 21st century skills such as problem solving and critical thinking. The multi-theme approach motivates children to construct a model they can relate to, while the ability to build many different models from the same set enhances creativity and engineering design thinking. INVENTOR Mechanics includes a range of new, highly technical parts that help create fully functional models and learn about various technologies. The top of the range is GINOBOT, a unique robotic vehicle with built-in sensors and Bluetooth which is fully programmable with simple-to-use coding software!

Some more advanced products of INVENTOR range:
